

METHOD AND SYSTEM FOR SURFACE PRODUCTION OF  
GAS FROM A SUBTERRANEAN ZONE

ABSTRACT OF THE DISCLOSURE

40003917-110101  
5 A method and system for surface production of gas  
from a subterranean zone includes forming a drainage  
pattern in a subsurface zone. The drainage pattern  
includes a plurality of cooperating bores and has a  
coverage area extending between the cooperating bores.  
Water pressure is lowered throughout the coverage area of  
the subsurface zone without significant subsurface  
drainage by producing water through the cooperating bores  
10 of the drainage pattern to the surface. Gas is produced  
from the coverage area of the subsurface zone with at  
least some of the water.
